

Microsoft 365 Copilot Readiness Assessment

The Cloud Collective's Copilot Readiness Assessment is the critical leg up you need to ensure you're ready to soar to new heights with Microsoft's game changing AI.

Why do you need the Microsoft 365 Copilot Assessment?

AI holds the opportunity to give you a critical advantage in your operations. Ensuring your environment is prepared for Copilot's is critical to giving you a head start. As part of this assessment, we will conduct a review across all the technical requirements, controls, data integration, data privacy and security considerations to ensure readiness for Microsoft 365 Copilot. This enables your organisation to confidently determine the next steps in enabling Microsoft 365 Copilot by identifying gaps, providing recommendations and guidance on maximising the return on the investment made in Microsoft 365 and Copilot.

What is the Microsoft 365 Copilot Readiness Assessment?

The Cloud Collective Microsoft 365 Copilot Assessment is a review performed in accordance with Microsoft best practices that includes recommendations to ensure your organisation and its data and security controls are ready for Microsoft 365 Copilot.

AS PART OF THE ASSESSMENT, OUR CONSULTANT WILL ADDRESS ELEMENTS SUCH AS:

- Review how your organisation is using Microsoft 365 services
- Review information architecture and Microsoft 365 Enterprise App Readiness
- Review external data integration, configuration and extensibility requirements
- Review security and data protection controls
- Understand future Microsoft 365 Copilot productivity goals.

How do we do it?

The assessment is prepared by Microsoft 365 certified consultants with a deep understanding of Microsoft 365 Copilot.

KEY ACTIVITIES

- A workshop is conducted to understand your use cases, current M365 usage, data integration requirements, security controls, regulatory requirements and future state of Microsoft 365 Copilot
- A review of the external data sources and M365 environment is completed
- Copilot configuration, extensibility, security and compliance best practice recommendations are prepared based on the assessment
- Recommendations on how to ensure you are copilot ready and maximise your investment in Microsoft 365 copilot are presented.

Microsoft 365 Copilot Readiness Assessment

Quick, successful adoption of Microsoft 365 Copilot will be a major competitive differentiator for organisations across all industries. Not preparing your organisation for Copilot puts you a step behind your competition and can lead to significant data risks if your environment is not set up properly. We're here to work together to build your confidence in AI and the unlock the potential it holds for your organisation.

Identify & define scope

Review existing M365
Services

Review information
architecture & external data
integration

Review security & data protection
controls

Construct insights into
organisational readiness

Prioritise findings,
recommendations & industry
standard guidance

What do you get?

Documented Microsoft 365 Copilot Assessment and report containing current state and recommendations and industry standard guidance to successfully adopt and extend Microsoft 365 Copilot.
